Save energy and water with a compact point of use storage water heater

Stiebel Eltron SNU Compact Storage Water Heaters

› SNU 5S | SNU 10S

- › Made in Germany (SNU)
- › Delivers hot water quickly to a single sink outlet
- › No more dripping from the tap during heat up due to unique Drip-stop design (SNU 5)
- › Thermo-stop function saves energy and prevents mixer tap from being heated in standby mode
- › Compact space saving design for installation flexibility
- › No safe tray, drainage or ventilation required
- › Low minimum standby power consumption
- › 4 styles of taps available

Convenience of hot water delivered quickly, whilst saving water and energy

Made in Germany the SNU under sink compact storage point of use water heater delivers hot water quickly and efficiently, saving both water and energy. Engineered for ease of installation with only a cold water feed and a standard GPO single phase 240V / 10 Amp power point required. The SNU is suitable for a wide range of locations such as Alfresco areas, kitchens, a laundry sink or an isolated sink location.

The SNU is available in either a 5 or 10 litre capacity and is small enough to be conveniently installed underneath a sink. This compact system works independently to the central hot water system, which means that when hot water is drawn off from the SNU it doesn't interfere with the hot water supply to other outlets. The SNU 5S only uses a remarkable 0.2 kilowatt hours of energy in standby mode to keep the water at 65° C for 24 hours through its thermal insulation.*

Technical Data

| Model | SNU 5S | SNU 10S |
|-------------------------------------------------|-------------------------------------|------------|
| Connection output | 2kW | 2KW |
| Rated voltage | 240V | 240V |
| Fuses (per phase) | 10 Amp | 10 Amp |
| Phases | 1/N/PE | 1/N/PE |
| Electrical installation | As per AS3000 | |
| Installation requirements | AS3500.4.2 & local requirements | |
| Type of installation | Under sink | Under sink |
| Capacity | 5 Litres | 10 Litres |
| Mixed water volume at 40°C from single draw off | 10 Litres | 19 Litres |
| Standby energy consumption / 24 hours at 65°C* | 0.2 kWh | 0.32 kWh |
| Temperature selection | up to 85°C | up to 85°C |
| IP Rating | IP24 | IP24 |
| Height | 421mm | 503mm |
| Width | 263mm | 295mm |
| Depth | 230mm | 275mm |
| Weight (filled with water) | 8.1kg | 15kg |
| Colour | white | white |
| Approvals | WaterMark Lic No. WMKA00301. AS3498 | |
